

COURSE OVERVIEW ME0742 Maintain Engines/Drivers

<u>Course Title</u> Maintain Engines/Drivers

Course Date/Venue

January 28-February 01, 2024/The Mouna Meeting Room, The H Dubai Hotel, Sheikh Zayed Rd - Trade Centre, Dubai, UAE

Course Reference ME0742

Course Duration/Credits Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide participants with a detailed and up-to-date overview of maintenance engines/drivers fundamentals. It covers the various types of engines/drivers; the gas turbines, I.C. engines and motors; the gas turbine basics, construction and device summary; the function and maintenance of gas turbine instrumentation; the gas turbine operating and maintenance; the description, maintenance and troubleshooting of gas turbine support systems; the gas turbine and auxiliary system preventive maintenance scheduling; and the major gas turbine mechanical maintenance.

Further, the course will also discuss the internal combustion engines (I.C.E.) and the diesel engine types; the engine cycles, timing mechanism construction and engine indicator diagrams; the engine construction and maintenance; the HP fuel pumps and maintenance, governors and maintenance and crankshafts and maintenance; the cooling system (air, water, oil) troubleshooting and maintenance: the lubrication system troubleshooting and maintenance: the transmission systems; and the various electric motors types, operations and performance.

ME0742 - Page 1 of 7

During this interactive course, participants will learn the 3-phase AC induction motors, motor speed control and motor failure analysis and testing; the basics of motor predictive maintenance techniques; the operating principles of the various types of engines/drivers at own location; how to use the appropriate tools and equipment to maintain engines/drivers and auxiliary systems; the operating parameters of each engine/driver at own location and the importance of maintaining performance within those parameters; the function of individual engines/drivers components and auxiliary systems; how to evaluate and interpret performance and integrity data of engines/drivers; and how to recognize and respond to abnormal conditions and take appropriate corrective action.

Course Objectives

At the end of this course, the trainee will be able to:-

- Apply and gain fundamental knowledge on maintain engines/drivers
- Explain the various types of engines/drivers used at own location
- Describe the operating principles of the various types of engines/drivers at own location
- Use the appropriate tools and equipment to maintain engines/drivers and auxiliary systems
- Describe the operating parameters of each engine/driver at own location and the importance of maintaining performance within those parameters
- Describe the function of individual engines/drivers components and auxiliary systems
- Evaluate and interpret performance and integrity data of engines/drivers
- Recognize and respond to abnormal conditions and take appropriate corrective action
- Identify the various types of engines/drivers as well as the I.C. engines and motors, and the basics, construction and device summary of gas turbine
- Discuss the function and maintenance of gas turbine instrumentation and the operating and maintenance of gas turbine
- Recognize gas turbine support systems covering description, maintenance and troubleshooting
- Illustrate gas turbine and auxiliary system preventive maintenance scheduling and major gas turbine mechanical maintenance
- Identify internal combustion engines (I.C.E.), diesel engine types, engine cycles, timing mechanism construction and engine indicator diagrams
- Carryout engine construction and maintenance, HP fuel pumps and maintenance, governors and maintenance, crankshafts and maintenance and cooling system (air, water, oil) troubleshooting and maintenance
- Employ lubrication system troubleshooting and maintenance and recognize transmission systems and the various electric motors types, operations and performance
- Illustrate 3-phase AC induction motors, motor speed control, motor failure analysis and testing and the basics of motor predictive maintenance techniques

ME0742 - Page 2 of 7

Who Should Attend

This course provides an overview of all significant aspects and considerations of maintain engines/drivers fundamentals for mechanical maintenance engineers, mechanical maintenance technicians, mechanical and rotating equipment engineers, plant maintenance engineers, production operations engineers, process engineers, supervisors, foremen and other technical staff.

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK[®]). The H-STK[®] consists of a comprehensive set of technical content which includes electronic version of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Fee

US\$ 5,500 per Delegate + **VAT**. This rate includes H-STK[®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures20% Practical Workshops & Work Presentations30% Hands-on Practical Exercises & Case Studies20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

• ******* • **BAC**

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Dr. Sayed Shaaban, PhD, MSc, BSc, is a Senior Mechanical Engineer with over 30 years of integrated industrial experience as a consultant and academic experience as a University Professor. His Machinery Vibrations wide expertise includes Analysis. Maintenance & Reliability Management, Machinery Failure Analysis & Prevention, Computerized Maintenance Management Systems (CMMS), Root Cause Failure Analysis (RCFA), Preventive Predictive Maintenance. Maintenance. Total Productive

Maintenance, Industrial Hydraulics, Mechanical Troubleshooting Maintenance, Pumps, Compressors, Bearings, Lubrication and Mechanical Shaft Alignment. Furthermore, he is also an expert in assets inspection & management, measurements & instrumentations, maintenance planning & scheduling, transportation planning & management, inspection & assessment of laboratory testing equipments, utility trucks, heavy equipment, diesel engines and technical report writing.

During his career life, Dr. Shaaban has gained his practical and field experience through his various significant positions and dedication as the Head of Automotive and Tractors Engineering Department, Project Manager, Technical Consultant, Team Leader and Material Testing Engineer for international companies, universities, colleges, institutes and research centers like the British Council, James Watt College of Scotland, Helwan University, Technical Research Center, Al Handasia Manufacturing Co., GIAD Manufacturing Co. and the Egyptian Standards Authority.

Dr. Shaaban has PhD degree in Mechanical Engineering from the Ecole Centrale (France) and has Master and Bachelor degrees in Mechanical Engineering. Furthermore, he is an author of more than 40 technical books along ten years of his work as a Technical Curricula Specialist in the Middle East and he has published 26 research papers in local and international scientific journals and conferences.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1:	Sunday, 28 th of January 2024
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0900	Introduction to Engines/Drivers
0900 - 0930	Types of Engines/Drivers
0930 - 0945	Break
0945 - 1030	Gas Turbines, I.C. Engines & Motors
1030 - 1230	Gas Turbine Basics
1230 - 1245	Break

ME0742 - Page 5 of 7

1245 - 1300	Gas Turbine Construction
1300 - 1330	Gas Turbine Device Summary
1330 - 1420	Gas Turbine Instrumentation (Function & Maintenance)
1420 - 1430	Recap
1430	Lunch & End of Day One

Day 2:	Monday, 29 th of January 2024
0730 - 0830	Gas Turbine Operating & Maintenance
0830 - 0930	Gas Turbine Support Systems: Description, Maintenance &
	Troubleshooting
0930 - 0945	Break
0945 - 1100	Gas Turbine & Auxiliary System Preventive Maintenance Scheduling
1100 – 1230	Major Gas Turbine Mechanical Maintenance
1230 - 1245	Break
1245 – 1330	Internal Combustion Engines (I.C.E.)
1330 – 1400	Diesel Engine Types
1400 - 1420	Engine Cycles
1420 – 1430	Recap
1430	Lunch & End of Day Two

Day 3:	Tuesday, 30 th of January 2024
0730 - 0830	Timing Mechanism Construction
0830 - 0930	Engine Indicator Diagrams
0930 - 0945	Break
0945 – 1100	Engine Construction & Maintenance
1100 – 1230	HP Fuel Pumps & Maintenance
1230 – 1245	Break
1245 – 1330	Governors & Maintenance
1330 - 1400	Crankshafts & Maintenance
1400 - 1420	Cooling System (Air, Water, Oil) Troubleshooting & Maintenance
1420 – 1430	Recap
1430	Lunch & End of Day Three

Day 4:	Wednesday, 31 st of January 2024
0730 - 0830	Lubrication System Troubleshooting & Maintenance
0830 - 0930	Transmission Systems
0930 - 0945	Break
0945 - 1100	Electric Motors Types, Operations & Performance
1100 – 1230	3-Phase AC Induction Motors
1230 - 1245	Break
1245 - 1330	Motor Speed Control
1330 - 1400	Motor Failure Analysis & Testing
1400 - 1420	Motor Predictive Maintenance Techniques: Basics
1420 - 1430	Recap
1430	Lunch & End of Day Four

ME0742 - Page 6 of 7

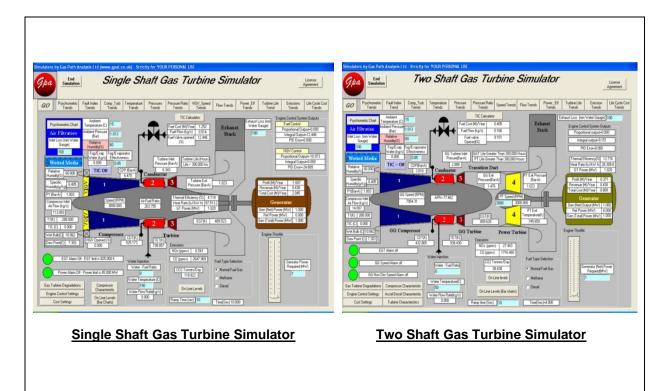

Day 5:	Thursday, 01 st of February 2024
0730 - 0830	Operating Principles of the Various Types of Engines/Drivers at Own
	Location
0830 - 0930	How to Use the Appropriate Tools & Equipment to Maintain
	Engines/Drivers & Auxiliary Systems
0930 - 0945	Break
0945 - 1100	Operating Parameters of Each Engine/Driver at Own Location & The
	Importance of Maintaining Performance within those Parameters
1100 – 1230	Function of Individual Engines/Drivers Components & Auxiliary
	Systems
1230 - 1245	Break
10.45 10.00	How to Evaluate & Interpret Performance & Integrity Data of
1245 – 1300	Engines/Drivers
1300 - 1345	How to Recognize & Respond to Abnormal Conditions & Take
	Appropriate Corrective Action
1345 - 1400	Course Conclusion
1400 - 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical session will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the "Single Shaft Gas Turbine Simulator" and "Two Shaft Gas Turbine Simulator".

Course Coordinator Kamel Ghanem, Tel: +971 2 30 91 714, Email: <u>kamel@haward.org</u>
